## THE MAGGIA VALLEY

A still predominantly natural landscape that is marked by the travelling river Maggia, characterizes the valley that starts at Lake Maggiore and gives access to the Alpine landscape. Fine sandy beaches, wide-scale natural pools, abraded rocks and massive waterfalls shape the image of this valley where hikers can discover the ancient traditions still untouched by modern hectic. It offers a quiet, peaceful and natural environment to relax and heal.

The Magic Maggia Valley presents itself through a wide valley floor and three lateral valleys (Rovana, Lavizzara and Bavona valley).

Seven hundred kilometres of trails form a dense network, allowing you to explore the entire Valle Maggia by foot.

Visitors of the Maggia Valley can find countless traces of an ancient world that still persists in the customs of the population. Constructional gems of inestimable beauty remember the faith of the people and to the success of some emigrants who returned rich. For many centuries, the population of the Maggia Valley lived mainly self-sufficient from the fields and livestock.

Explore the Vallemaggia through its "Sentieri di Pietra" (Stone Trails), a serial of historical-cultural itineraries that will allow you to discover the magic secret of almost every village of this area.
